PROFESSIONAL SUMMARY

Computer Science undergraduate at MIT World Peace University with a Cloud Computing background and hands-on experience building web applications and deploying containerized workloads. Built an end-to-end CI/CD workflow using GitHub, Jenkins, Docker and Kubernetes (K3s) on AWS EC2, alongside AI-enabled application and data-analysis projects. Interested in software engineering, cloud engineering and DevOps opportunities.

TECHNICAL SKILLS

Programming: Java, C, C++, Python (developing), SQL

Cloud & DevOps: AWS (EC2, S3, IAM, ECR, CloudFormation), Docker, Kubernetes (K3s), Jenkins, CI/CD, Linux, Git, GitHub

Web & Data: HTML, CSS, JavaScript, MERN-stack concepts, MongoDB, R, Hadoop and Spark (academic exposure)

PROJECTS

Student Task Manager — CI/CD & Kubernetes Deployment

AWS EC2, Ubuntu, Jenkins, GitHub Webhooks, Docker, Kubernetes (K3s)

- Built an automated delivery workflow that triggers from GitHub pushes through webhooks and Jenkins.
- Configured Jenkins to build a Docker image and publish it to a container registry, then deploy the application to a K3s Kubernetes cluster.
- Deployed the application with Kubernetes YAML manifests, multiple replicas and a Service to expose the workload.

AI-Powered Interview Agent with Resume Analysis

MERN Stack, MongoDB, AI integration, payment integration

- Developed an interview-practice application that extracts resume information and uses AI to evaluate interview responses.
- Designed data storage for users, resumes, interviews and payment-related records, with administrative monitoring and analytics.

Breast Cancer Classification & Analysis

R, Random Forest, Decision Tree, data visualization

- Performed exploratory analysis and built classification models to study breast-cancer dataset patterns.
- Compared Decision Tree and Random Forest performance and used visualization and evaluation techniques to interpret results.

EDUCATION

MIT World Peace University (MIT-WPU), Pune | Expected 2027

B.Sc. Computer Science — Honours / 4th Year (Cloud Computing background)

ADDITIONAL INFORMATION

Academic focus: Cloud Computing, Cloud Infrastructure Management, Big Data and Big Data Analytics. | Open to entry-level Software Development, Cloud Engineering and DevOps internship opportunities.
